The North Carolina Society of Certified Public Managers promotes excellence in public service through support of the North Carolina Certified Public Manager® (CPM) program designed for middle managers from federal, state, and local government organizations. This credentialing program translates academic theory into practical (real world) application as evidenced by skills, attitudes, behaviors, and best practices which characterize successful management. Through involvement and providing continuous learning opportunities for NCSCPM members or non-members, including CPM graduates, associates, students, and other leaders in local, state, or federal government, the Society endeavors to support and achieve this mission.
